DISCOVERY
SOLUTIONS, INC.

ZixCorp Hosted Email Security

Discovery Solutions, Inc's email encryption service is an important tool in the protection of sensitive data. Numerous organizations across North America have turned to Discovery Solutions and Zix Corporation to help meet business requirements, industry regulations, and government mandates while also protecting customer privacy in all their email communications. Our encryption services provide an easy-to-use and deploy solution to protect, manage and deliver sensitive information to healthcare, financial, insurance and government industries.

Discovery Solutions, Inc. has made a space for themselves in the industry from their partnership with ZixCorp (Nasdaq: ZIXI), the leader in email encryption services, to provide in-the-cloud, compliance-ready e-mail encryption services to customers who seek to secure the transmission of sensitive data. This collaboration provides a comprehensive Software-as-a-Service (SaaS) email security bundled solution. This menu of affordable, hosted services makes enterprise-grade email security, compliance and risk management accessible for customers of all sizes - from the fortune 500 to the solopreneur - to protect this business-critical mode of communication from the risk of breach, data loss or disaster. As the largest in-the-cloud email encryption provider, ZixCorp protects millions of email addresses, including those at some of the largest names in the healthcare, insurance, financial and government sectors. The company's easy-to-use service leverages ZixCorp's global managed public key infrastructure, eliminating the need for certificate and key management for customers, and provides a turnkey solution that allows customers to communicate seamlessly and securely with no additional work.

Zix Email Encryption provides out-of-the-box, compliance-ready e-mail encryption services to organizations that need to secure the transmission of sensitive data, and automate the e-mail encryption process to ensure the security of e-mail communications, all the while reducing the risk of data breach and meeting regulatory compliance requirements. Our encryption service provides a cost effective solution without the hassles of managing your own complicated digital certificates or encryption keys. Our hosted solution enables policy driven email security, content filtering and send-to-anyone capability while remaining compliant with a growing body of regulations including state and federal mandates.

Discovery prides itself on maintaining the highest levels of performance and reliability. Securing the personal information of customers, partners, and employees is more than just a value-added service - it's often the law. Whether it is financial data, medical records, or your corporation's proprietary information, you should, and often legally must, secure the delivery of sensitive content through to its destination.

Discovery Solutions Inc, provides ZixVPM as an appliance, ZixVPM as Software as a Service (SaaS), ZixPort which is a custom branded portal where your clients pick up their encrypted mail and initiate secure email with you, and the stand alone ZixMail for the individual or workgroup. In addition to Email Encryption we can also provide whole disk encryption by McAfee and Safend to keep your Laptops, PDA's and smart phones safe and secure.
